RURAL INDUSTRIES AND SETTLEMENT AND METEOROLOGY

P 31388—1 K 6024

PREFACE

This issue of the *Rural Industries and Settlement and Meteorology* Part of the *Statistical Register of New South Wales* contains statistics for 1966–67, 1965–66 and earlier years.

The statistics given in this publication should be read in conjunction with the *Official Year Book of New South Wales*. For the latest figures in the principal statistical series, the reader should refer to other publications of the Bureau, particularly the *Statistical Bulletin* and the *Monthly Summary of Business Statistics*.

My thanks are tendered to the responsible officers of the various State and Commonwealth Departments and to others who have supplied information, often at considerable trouble.

R. G. Walker
Deputy Commonwealth Statistician
and
Government Statistician of New South Wales

Statistics of Rural Industries : Explanatory Notes 5
Copy of Collection Form used for Year ended 31st March, 1967 6

Rural Industries: General

1. Rural Holdings : Number, Area, and Land Use, 1938-39 to 1966-67 14
2. Rural Holdings, Crops, and Livestock, in Divisions, 1966-67 14
3. Rural Holdings: Number, Area, and Land Use, in Statistical Divisions and Local Government Areas, 1965-66 .. 15
4. Rural Holdings: Number, Area, and Land Use, in Statistical Divisions and Local Government Areas, 1966-67 19
5. Rural Holdings Classified by Area of Holding and by Area of Sown Grasses and Clovers, 1966 23
6. Area under Sown Grasses and Clovers, in Divisions, 1958 to 1967 23
7. Rural Holdings Classified by Area of Holding, in Divisions, 1966 24
8. Rural Holdings Classified by Area of Holding and by Type of Activity, 1965-66 26
9. Persons Permanently Resident on Rural Holdings, 1956 to 1967 28
10. Persons Engaged on Rural Holdings, 1931 to 1967 28
11. Persons Permanently Engaged on Rural Holdings, in Divisions, 31st March, 1966 28
12. Persons Permanently Engaged on Rural Holdings, in Divisions, 31st March, 1967 29
13. Machinery on Rural Holdings, 1964 to 1967 29

Tractors on Rural Holdings—

14. In Divisions, 1939 to 1967 30
15. Type and Age of Tractor and Type of Fuel Used, 1966 30
16. Type, Horse-power, and Age of Tractor and Type of Fuel Used, 1966 31
17. Rural Holdings Classified by Number of Tractors on Holding, in Divisions, 1966 31
18. Cultivating Implements on Rural Holdings, in Divisions, 1967 32
19. Grain and Seed Harvesters on Rural Holdings, Classified by Type of Harvester, Width of Cut, Type of Front, and Age, 1967 32
20. Pick-up Balers and Forage Harvesters on Rural Holdings, in Divisions, 1965 33
21. Crops Treated with Artificial Fertilizers, 1956-57 to 1966-67 33
22. Pastures Treated with Artificial Fertilizers, 1956-57 to 1966-67 33
23. Crops and Pastures Treated with Artificial Fertilizers, in Divisions, 1962-63 to 1966-67 34
24. Superphosphate Used on Crops and Pastures, in Divisions, 1962-63 to 1966-67 35
25. Superphosphate Used on Wheat, in Divisions, 1965-66 35
26. Superphosphate Used on Wheat, in Divisions, 1966-67 36
27. Artificial Fertilizers Used on Principal Crops, in Divisions, 1965-66 36
28. Artificial Fertilizers Used on Principal Crops, in Divisions, 1966-67 37
29. Aerial Agriculture, 1956-57 to 1966-67 37

SECTION I. RURAL INDUSTRIES

STATISTICS OF RURAL INDUSTRIES: EXPLANATORY NOTES

SOURCES AND COVERAGE

(*a*) The statistics relating to the rural industries, as shown in Part *Rural Industries* of the *Statistical Register*, have been compiled generally from statutory returns supplied annually by occupiers of rural holdings in New South Wales. A specimen of the main Form used in the annual collection is reprinted on pages 6 to 13.

(*b*) A *rural holding* is defined for statistical purposes as a landholding, of one acre or more in extent, used for the production of agricultural products (including fruit and vegetables, nursery plants, etc.) and/or for the raising of livestock (including poultry) and the production of livestock products. From the 1963-64 season, the scope of the statistics was extended to include those holdings of less than one acre in extent engaged in nursery (including cut-flower) production.

(*c*) An occupier who works more than one rural holding is in general required to supply a separate annual return for each holding. If, however, the holdings are not far apart and are worked as one, the occupier may (and in many instances does, in fact) supply a single composite return covering the holdings concerned. The holdings covered by a composite return are regarded, for statistical purposes, as forming a single rural holding.

(*d*) *Lists of Rural Holdings.* The maintenance of comprehensive lists of rural holdings in New South Wales is facilitated by a system (introduced in 1957-58) of tracing the changes in ownership and tenancy reported by occupiers of rural holdings and by reports from local police officers (who assist in the distribution and collection of the annual census returns). The lists of holdings in the Western Division of the State are reconciled periodically with the records of the Western Lands Commission; lists of holdings in other parts of the State, and of holdings engaged in specialized areas of farming, are reconciled with available administrative records from time to time as resources permit.

(e) *Special Check of Lists of Rural Holdings, 1955–56*

i. In 1955-56, the lists of rural holdings used in the collection of statistics of rural industries were reconciled with the lists of rateable land of one acre or more in extent recorded by country shires for rating purposes. After eliminating lands not used for rural industry purposes, this reconciliation led to the listing of an additional 4,784 rural holdings.

ii. As many of the additional holdings were being used in 1955-56 for grazing (either full-time or part-time) and were on the whole lightly stocked, the only items of statistics in this publication appreciably affected in total were Number and Area of Rural Holdings, Land Use on Rural Holdings, and Persons Resident on Rural Holdings. For these items, the relevant tables give particulars for 1955-56 both on the new basis and on a basis comparable with previous years. For other items, continuity of comparison was not materially affected by the inclusion of the additional rural holdings. The main statistics recorded for the additional holdings in 1955-56 are shown on page 167 of Part *Rural Industries* of the *Statistical Register* for 1954-55.

(*f*) An additional 1,352 rural holdings were included in the 1963-64 collection, following a reconciliation of the lists of holdings with lists of rateable land in the former Cumberland Statistical Division. The additional holdings were mostly small holdings (the majority being less than 10 acres in extent), and were mainly nurseries, orchards, market gardens, and poultry farms. The items " Number of Holdings ", "Total Area of Holdings", "Nurseries", "Poultry", and "Pigs" were affected to some extent by the inclusion of the additional holdings, but continuity of comparison of other items of statistics for the former Cumberland Division was not materially affected.

CLASSIFICATION OF RURAL HOLDINGS BY SIZE AND BY TYPE, 1965-66

Special classifications of rural holdings by the size of the principal characteristics of the holdings (area, area under crops, numbers of livestock, etc.) and by type of activity (sheep, cereal grain, meat cattle, milk cattle, etc.) were undertaken on the basis of information given in the annual census returns collected for the 1965-66 season.

A selection of the size classifications for the 1965-66 season is included in this issue of *Rural Industries*. The principal classification of holdings by type of activity in 1965-66 is summarised on page 26 of this issue where a brief explanation of the method of classification by type is given. The full series of classifications by size and by type of activity has been published in *Classification of Rural Holdings by Size and Type of Activity, 1965-66*, Bulletin No. 1, New South Wales, copies of which are available from this Bureau.

Similar classifications of rural holdings by the size of their principal characteristics and by type of activity were last undertaken for the 1959-60 season. The full series of classifications for this season was published in *Classification of Rural Holdings by Size and Type of Activity, 1959-60*, Bulletin No. 1, New South Wales.

CONFIDENTIAL NEW SOUTH WALES A & P FORM 1

AGRICULTURAL, DAIRYING AND PASTORAL STATISTICS—SEASON 1966–67

COLLECTED UNDER THE CENSUS AND STATISTICS ACT 1905-1949

Name, Holding Name and Postal Address
PLEASE AMEND IF INCORRECT

Persons Required to Complete this Return

- The occupier (whether owner, lessee, or tenant) is responsible for the completion of an Agricultural, Dairying, and Pastoral statistical return in respect of each landholding, of one acre or more in extent, used for agricultural, horticultural, viticultural, dairying, pastoral, or similar purposes.
- An occupier of more than one holding may submit a single combined return if the holdings are not far apart and are worked as one. If a combined return is submitted, return uncompleted any other form received and indicate where the particulars relating to the holding specified have been included.

Secrecy of Returns

- In terms of the Census and Statistics Act, individual returns will be regarded as STRICTLY CONFIDENTIAL, and will be used solely for the compilation of statistics. Under no circumstances whatsoever will the contents of individual returns be disclosed to any other person or to any other GOVERNMENT AUTHORITY.

Production of the Holding

- The TOTAL PRODUCTION of the holding should be included, whether grown by the occupier or sharefarmers, and whether sold, held for sale, retained for seed or other use on the holding, or otherwise disposed of.

1. CHANGES IN AREA OF HOLDING since 31st March, 1966

If you have sold, let, leased, or otherwise disposed of your holding, or any part of it since 31st MARCH, 1966, or increased the area of it, please give particulars below. Where the holding has been wholly disposed of during the year, figures given in the return should relate to the period up to the date of disposal.

(a) LAND DISPOSED OF BETWEEN 1st APRIL, 1966 AND 31st MARCH, 1967
(Include any land previously leased to you, which was vacated during this period)

Area (Acres)	Shire or Municipality in which Land is Situated	State Whether Sold, Leased, Rented or Vacated by You	Name and Postal Address of Present Owner (if Sold or Vacated) or Occupier (if Leased or Rented) (Use BLOCK Letters)

(b) LAND ACQUIRED BETWEEN 1st APRIL, 1966, AND 31st MARCH, 1967
(Include any land previously leased by you, which has reverted during this period)

Area (Acres)	Shire or Municipality in which Land is Situated	State Whether Bought, Leased, Rented or Reverted to You	Name and Postal Address of Previous Owner (if Bought or Leased) or Occupier (if Reverted) (Use BLOCK Letters)

2. TENANCIES EXISTING at 31st March, 1967

(Include only land used for rural purposes)

11. OTHER CEREAL CROPS

1. Areas sown for grain or hay which failed entirely should be included in the total area sown according to the original intention of the grower, even if fed off or ploughed in. Do not include these areas under "Green Fodder". Complete failure should be denoted by "F" in production column. Area of wheat, oats, etc., re-sown after germination failure should be included once only.
2. A crop on which livestock have grazed and which has been subsequently harvested for grain or hay should not be included in area for green fodder.
3. Areas for green fodder should include, under the appropriate crop heading, areas completely fed off, or cut for green feed or silage. Do not include here areas for grain or hay which were fed off because of failure or were partly fed back while the crop was growing.

* The areas of land used for sowing more than one crop in a season are counted for each crop.

† Excludes native grass, but includes paspalum.

‡ This is a balancing item. It represents the area of land (other than under sown grasses and clovers and certain crops fed off) used for grazing, the area occupied by buildings, etc., and the area of forested, mountainous, etc., land not used for farming or grazing purposes.

¶ Not available.

§ Includes Fallow Land.

* Beef-breed bulls and cattle mainly for meat production.

† Dairy-breed bulls and cows, heifers, and heifer calves used (or intended) for the production of milk or cream for sale.

‡ Includes holdings where neither potatoes nor other vegetables alone accounted for more than half of the gross receipts of the holding, but where together they accounted for more than half of the receipts.

Note. The classification of rural holdings by type of activity was undertaken on the basis of information given in the annual census returns supplied for the 1965-66 season by occupiers of rural holdings.

In general, each holding was classified to the activity which accounted for more than half of the estimated gross receipts of the holding.

There were, however, exceptions to the general rule:—

1. Certain holdings were not classified by type. These consisted of—

(*a*) "sub-commercial" holdings (those with gross receipts of less than $1,600);

(*b*) holdings used for intermittent grazing, and those not used in 1965-66.

2. In the case of holdings with sheep and cereal grain, the two activities were treated as a single joint activity if together they accounted for at least three-quarters of the holding's gross receipts and if neither activity contributed more than four times the other. Holdings which satisfied this condition were classified as "sheep and cereal grain" holdings.

3. Holdings with milk cattle and pigs contributing together more than half the gross receipts of a holding were classified as "milk cattle" holdings, irrespective of the relative contribution of each activity.

4. If no single activity accounted for at least half of the gross receipts, the holding was classified as a "multi-purpose" holding.

The "gross receipts" of each holding were estimated from the areas of crops and numbers of livestock shown in the census return for 1965-66 and rom unit values derived from average yields or turn-off and average prices (at the holding) of crops and livestock products marketed in the seasons 1960-61 to 1964-65. In estimating the receipts from meat cattle and milk cattle, however, unit values for the two seasons 1963-64 and 1964-65 were used (changes in the classification of cattle were introduced in 1963-64).

‡ Owing to changes in the Form used in the annual collection and other factors affecting the statistics, figures for 1961 and later years are not comparable with those published for earlier years. However, the longer term comparisons in the above table, though not strictly on a uniform basis, are broadly illustrative of trends in the numbers engaged on rural holdings.

‡ In the Australian decimal currency system, which was introduced on 14th February, 1966, the monetary unit is the dollar ($), divided into 100 cents. Two dollars are equal in value to £1, the monetary unit in the former currency system. All values in this table have been converted to the equivalent amounts in decimal currency.

* Bearing vines only.
† Bearing trees only.
‡ In the Australian decimal currency system, which was introduced on 14th February, 1966, the monetary unit is the dollar ($), divided into 100 cents. Two dollars are equal in value to £1, the monetary unit in the former currency system. All values in this table have been converted to the equivalent amounts in decimal currency.

† The production of wine was 6,438,919 gallons.
‡ Not yet of bearing age.
¶ Areas and production cannot be related, as grapes are not always used for the purpose for which originally grown.
§ Dried weight.
‖ Areas of land used for sowing more than one crop in a season are counted for each crop. Excludes grass and pasture cut for hay (243,429 acres produced 345,020 tons) and grasses and clovers harvested for seed (20,395 acres).

* Land under crops which failed is reckoned in the average.
† The production of wine was 7,893,255 gallons.
‡ Not yet of bearing age.
¶ Area and production cannot be related, as grapes are not always used for the purpose for which originally grown.
§ Dried weight.
‖ Areas of land used for sowing more than one crop in a season are counted for each crop. Excludes grass and pasture cut for hay (319,279 acres produced 509,170 tons) and grasses and clovers harvested for seed (48,579 acres).

* In 1928-29 and later seasons, areas of wheat which failed entirely are included in the column which corresponds to the purpose for which the wheat was sown. In 1927-28 and earlier seasons, however, all areas of wheat which failed entirely and were fed-off are included in the column "For Green Fodder".

† Flour has been expressed as its equivalent in wheat (1 ton of flour = 48 bushels of wheat prior to 1950-51, and 46·3 bushels in 1950-51 and later years).

* Basic selling prices of Australian Wheat Board for f.a.q. bulk wheat, f.o.b. Sydney. These quotations are more or less nominal, with sales being made above and below the basic price from time to time; for some destinations, where other exporting countries have a geographical freight advantage, actual selling prices are lower than the basic prices. Quotations are the average of the twelve monthly prices, year ended July.

† Separate export prices are shown for wheat sold under the terms of the International Wheat Agreements and for other wheat. There has been no differential between these prices since 1952-53, all Australian export wheat being sold at prices within the range of maximum and minimum prices fixed under the Agreements.

‡ Price charged by Australian Wheat Board for bulk wheat for flour for local consumption, f.o.r., Sydney. Average of the twelve monthly prices, year ended November.

¶ Average return, f.o.r. country rail siding, allowing for cost of bags and including governmental assistance to wheat growers. Pool season generally year ended October.

§ In the Australian decimal currency system, which was introduced on 14th February, 1966, the monetary unit is the dollar ($), divided into 100 cents. Two dollars are equal in value to £1, the monetary unit in the former currency system. All values in this table have been converted to the equivalent amounts in decimal currency.

* Choicest grade butter. Bases are as follows:—
1949-50 to 1954-55: United Kingdom Government contract prices, f.o.b., Australia.
1955-56 to 1966-67: Weighted average price, f.o.b., Australia, of butter sold in United Kingdom.
† Average price for choicest quality bulk butter supplied in 56 lb. boxes, delivered (including price of box).
‡ Weighted average price, per lb. of commercial butter, paid to dairy farmers for cream supplied to butter factories in N.S.W. It includes the government subsidy which has been paid in each year since 1942-43.
¶ In the Australian decimal currency system, which was introduced on 14th February, 1966, the monetary unit is the dollar ($), divided into 100 cents. Two dollars are equal in value to £1, the monetary unit in the former currency system. All values in this table have been converted to the equivalent amounts in decimal currency.

* Average for all sheep, including lambs. Includes crutchings.

† Excludes profits realised under the war-time plan for disposal of the 1939-40 to 1945-46 wool clips. Eight distributions of such profits were made, viz., $18,846,000 in 1949-50, $18,846,000 in 1951-52, $12,054,000 in 1952-53, $12,482,000 in 1953-54, $9,782,000 in 1954-55, $406,800 in 1956-57, $121,000 in 1957-58, and $92,600 in 1958-59.

‡ In the Australian decimal currency system, which was introduced on 14th February, 1966, the monetary unit is the dollar ($), divided into 100 cents. Two dollars are equal in value to £1, the monetary unit in the former currency system. All values in this table have been converted to the equivalent amounts in decimal currency.

‡ In the Australian decimal currency system, which was introduced on 14th February, 1966, the monetary unit is the dollar ($), divided into 100 cents. Two dollars are equal in value to £1, the monetary unit in the former currency system. All values in this table have been converted to the equivalent amounts in decimal currency.

Note. The above prices for sheep represent the averages for all sheep, whether shorn or woolly ; but as a general rule, the fat sheep at market in January and February are shorn ; during March and April they have growing fleece ; from May to August they are woolly ; and in September to December they comprise both shorn and woolly.

* The quantity of eggs under the control of the Board in a pool year does not represent the total production of eggs in the State in that year. The estimated total production of eggs, based on the Board's records and including allowances for eggs produced in areas and from flocks not controlled by the Board and for production from poultry keepers who evaded the Board's control, was 95·5 million dozen in 1966-67.

† Average realised price less contributions to marketing pool and towards Board's administrative expenses.

‡ Includes liquid whole egg, liquid egg whites, and liquid egg yolks.

* The production figures for 1907 and earlier years exclude wool exported on skins.
† Production on farms is included in 1963-64 and previous years but excluded from 1964-65 and later years. The quantity of butter produced on farms in 1963-64 was 652,000 lb. In recent years the quantities of cheese and bacon and ham produced on farms has been negligible.
‡ Cured weight. Pressed ham and canned bacon and ham are included on a bone-in weight basis in 1951-52 and later years, and on a bone-out weight basis in earlier years.

* Excludes animals and carcasses condemned as unfit for human consumption.
† Includes production from stock slaughtered on farms.
‡ Bone-in weight basis.
¶ Bone-in weight of dressed carcasses. Includes meats later converted into bacon and ham.
§ Production on farms is included in 1963-64 and earlier years but excluded from 1964-65 and later years. In recent years, the quantities produced on farms have been negligible.
‖ Cured weight. Pressed ham and canned bacon and ham are included on a bone-in weight basis in 1951-52 and later years, and on a bone-out weight basis in earlier years.

* Estimated by applying to recorded production the average annual wholesale prices in the principal markets; includes subsidies paid to producers.
† Excludes profits realized under the war-time plan for disposal of the 1939-40 to 1945-46 wool clips. Eight distributions of such profits were made, viz., $18,846,000 in 1949-50, $18,846,000 in 1951-52, $12,054,000 in 1952-53, $12,482,000 in 1953-54, $9,782,000 in 1954-55, $406,800 in 1956-57, $121,000 in 1957-58, and $92,600 in 1958-59.
‡ In the Australian decimal currency system, which was introduced on 14th February, 1966, the monetary unit is the dollar ($), divided into 100 cents. Two dollars are equal in value to £1, the monetary unit in the former currency system. All values in this table have been converted to the equivalent amounts in decimal currency.

* The net value of production is the gross value of production at principal markets (including subsidies paid to producers) less the estimated costs of marketing and certain costs of production. The production costs deducted are:—
Rural Industries: Costs of seed, fertilizers, water for irrigation, sprays and dips, and stock feed;
Fisheries and Whaling: Costs of fuel and repairs and upkeep of boats and equipment;
Mines and Quarries: Costs of timber, fuel, explosives, and other materials.
